#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 30-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 30-38 recites "system" which is vague and indefinite since the common meaning of the term does not clearly determine the statutory class of invention. Since the term system may encompass more than one statutory class, there is a requirement for an indication on the record as to what statutory class of invention the "system" claims belong to (see MPEP 2106.IV.B). The statutory provision for this requirement may be found in 35 U.S.C 101 that recites the statutory classes of invention.

For the purposes of this examination these claims are considered apparatus.

### Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Application/Control Number: 09/843,206 Page 3

Art Unit: 1762

4. Claim 39 is rejected under 35 U.S.C. 101 because there is claimed a non-statutory subject matter.

A computer program must be claimed as a computer-readable medium encoded with a data structure. There must be positively recited in the body of the claim at least one recitation defining structural and functional interrelationships between the data structure and the computer software and hardware components (a useful, concrete and tangible result produced). This permits the data structure's functionality to be realized, as more than a manipulation of an abstract idea [*In re Wamerdam*, 33 F.3d 1354; 31 USPQ2d 1754 (Fed. Cir. 1994)].

Since the claims do not include that a computer-readable medium encoded with a data structure, there is claimed solely software.

### Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 30-32, 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitano et al in view of Wong et al.

Art Unit: 1762

Kitano et al discloses an economical data processing system. Virtual space is formed and used with a network includes a plurality of computers connected to each other (col 6, lines 28-67). Value information stores value information representing value provided in the virtual space and the value information is delivered in the virtual space (col 19, lines 10-67;, col 20, lines 12-5). Value of the value information is represented as value data (col 7, lines 33-35) and value information storing stores said valuable information in relation with said value data. A value information evaluation evaluates a value of said valuable information so as to generate said value data of said valuable information (col 7, lines 40-46). The value information may be image information (col 6, lines 38-43).

There is not explicitly disclosed to Kitano et al:

virtual currency;

value information;

virtual currency evaluating, and,

currency exchanging.

Wong et al discloses: virtual currency (col 6, lines20-33), virtual currency evaluation (col 6, lines 41-48) for exchanging said virtual currency with said real currency (col 8, lines 54-67).

Application/Control Number: 09/843,206

Art Unit: 1762

It would have been obvious to one with ordinary skill in the art to include

Page 5

forming virtual currency to Kitano et al because Wong et al teaches virtual currency is

desirable for network systems rather than conventional means of payment (col 1, lines

30-42).

It would have been obvious to one with ordinary skill in the art to include value

information storage and evaluation to Kitano et al because Kitano et al teaches that a

virtual currency is used in virtual space to make purchases (col 2, lines 8-11).

It would have been obvious to one with ordinary skill in the art to include a

virtual currency evaluation to Kitano et al because Wong et al teaches evaluation

required of virtual currency before it may be stored (col 7, lines 12-16)

7. Claims 33-36 are rejected under 35 U.S.C. 103(a) as being unpatentable

over Kitano et al in view of Wong et al as applied to claims above, and further in view of

Martinez et al.

Kitano et al in view of Wong et al does not explicitly disclose:

a ID data generating.

Martinez et al discloses a ID data generating and ID data determination (fig 9 and col 21, lines 55-67; col 22, lines 1-67) for use in transactions. Martinez et al also discloses rewards (col 10, lines 12-39) utilized by transaction users.

It would have been obvious to one with ordinary skill in the art to include a ID data generating because Martinez et al teaches that valid IDs are required for a proper transaction (col 22, lines 61-62).

#### Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 571-272-6739. The examiner can normally be reached on about 7:30 am to 5:00 pm (Mon. thru Thurs.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Regarding all Class 705 applications, the management contact regarding examination is: Vincent Millin (SPE, art unit 3624) at 571-272-6747.

Application/Control Number: 09/843,206

Art Unit: 1762

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
